SUNYANI	250	79.696	\$177.233.225
TEMALE	250	79.696	\$181.531.675
BOLGATANGA	300	83.456	\$208.144.915
Total Amount	1550	419.445	\$1.018.646.940

The main project objective is the construction of highly specialized clinics in various medical disciplines to improve the health system in Ghana in a revolutionary manner. The locations of the hospitals cut across the country from the north to the south. Ghana does not have specialist hospitals with the exception of the Korle-Bu Teaching Hospital, the Komfo Anokye Teaching Hospital in Kumasi. Even these ones are not fully equipped to meet the challenges of the day.

An important target group is also the surrounding market in Africa since there are only Morocco, Algeria and South Africa which have similar facilities.

The hospitals will be conducted by a worldwide leading developer of healthcare projects with over 700 already realized projects. This company is also the consultant during the operation of the hospitals and is responsible for the management of the facilities during the first 12 months. Additional cooperations with medical universities in Europe are concluded. Thus ensures the exchange of know-how and technical personnel.

There will be a project oversight committee including members of the task force, the minister of health, Asare-Ab Company Ltd. The implementing partners for the project are Asare-Ab Company Ltd, the Ministry of Health and the Ghana Health Service, the operators of the facilities.
